Network ID Value, 252				

FIG. 11D

The diagram illustrates the structure of a NAR_ATTRIBUTE (NAR_ATTR) and its relationship to IP header fields. The NAR_ATTR is defined by the following table:

NAR_ATTR Type	NAR_ATTR Code	NAR_ATTR Qualifier	NAR_ATTR Length
0x20	0x06	FLOW	5

The NAR_ATTR Type field contains the value 0x20, which corresponds to the IP Source Address (262). This value is highlighted with a red box.

The table is divided into four sections, each associated with an IP header field:

- IP Source Address, 262**: Corresponds to the NAR_ATTR Type field.
- IP Destination Address, 263**: Corresponds to the NAR_ATTR Code field.
- Type of Service, 265**: Corresponds to the NAR_ATTR Qualifier field.
- Destination Port, 267**: Corresponds to the NAR_ATTR Length field.

FIG. 11E

NAR_ATTR Type		NAR_ATTR Code			NAR_ATTR Qualifier			NAR_ATTR Length		
		Dir	R	Type						
0x40	0x40	s	d	UINT32				2		
		r	e	UINT64				3		
		c	t							

Count

FIG. 12

FIG. 13A

The diagram illustrates the bit layout of the NAR_ATTR_Type and NAR_ATTR_Code fields. The NAR_ATTR_Type field is shown as a 16-bit register with bits numbered from 0 to 15. An arrow points to bit 11, which is highlighted. The NAR_ATTR_Code field is shown as a 16-bit register with bits numbered from 0 to 15. Bits 11 to 0 are labeled 'Dir' and bits 15 to 12 are labeled 'NAR_ATTR Qualifier'. The 'Dir' bits are set to 0x01. The 'NAR_ATTR Qualifier' bits are set to 0x00. The 'NAR_ATTR Length' field is shown as a 16-bit register with bits numbered from 0 to 15. It contains the value 1 + (ObjectLen div 4).

NAR_ATTR Type	NAR_ATTR Code	NAR_ATTR Qualifier	NAR_ATTR Length
0x80	0x01	0x00	1 + (ObjectLen div 4)
